*Edition and Monoprint Collage Series*

The nine editioned and twenty unique monoprint collages completed by Steven Sorman in 1985 were assembled from impressions made on Oriental and Western papers and materials the artist prepared in his studio and brought to the workshop. He created his print imagery using found architectural wood ornaments and drawn copper, magnesium, and aluminum plates.

Sorman layered papers, contrasting shades of white and off-white, natural, and yellow-ocher. His compositions involve a complex range of tones and colors that result from collaged papers, printed inks, and painted or drawn areas.
