Michael Heizer

Paper Collage Series

Michael Heizer created twenty-four unique paper collages in April 1979, using cut and torn fragments from different offset lithographic and monotype screen printings he made in 1976 in collaboration with Kenneth Tyler, John Hutcheson, and Kim Halliday. Heizer arranged his cut and torn collage elements and, assisted by Lindsay Green, Rodney Konopaki, and Tyler, glued them onto off-white four-ply rag board. The collages were pressed flat in a platen press. The artist then selected some for hand-coloring with oil and aery lie paints.

Each collage is signed Heizer and dated in pencil lower right of center, with the chop mark and series number lower right verso.
